

# Creating places where people want to live

Planning Policy provides guidance to developers so let's work together to create policies that enhance the quality of our neighbourhoods.

Many of the big issues such as flooding, transportation, affordable housing and green infrastructure are covered through National or proposed Regional and South Worcestershire Core Strategy Policies.

The following boards indicate some local policy issues we believe need to be covered. Do you agree? Are there any we have missed?

Your local knowledge will be valuable in helping to create the local policies important to you.
